Working condition: Rs.60,000/-

### **ATI Model 2H:**

Non-working condition; Rs.30,000/-

Working condition: Rs.75,000/-

Against this buy-back, we offer you the world's most advanced digital aerosol photometer with printer ATI model 2i with the following features:

- Upstream aerosol mass concentrations are displayed in actual values of micrograms per litre
- Three unique data report functions – continuous, monitoring and summary modes
- ***Thermal printer option to meet documentation requirements***
- USB output for connection to computer
- LCD graphic screens on probe and base unit, **no need to get down from step-ladder while testing ceiling terminal HEPA filters**
- ***Electronic valve switching with LED indicator***
- Flow rate is displayed on both screens
- ***New dual head diaphragm pump, no carbon vanes so no need for exhaust filter***
- Eight reagents programmed – PAO, DOP, Ondina, PEG, Krydol, corn oil, mineral oil, paraffin
- Carrying case with handle supplied

**This advanced model photometer 2i is available ex-stock in Indian rupees at a very attractive price.**
